PRODUCT DESCRIPTION

Transform your project management approach with our innovative Armorgard DS2 DataStation, a compact, on-site digital command center. Equipped with a large 43-inch display, three convenient power sockets, and bright LED lighting, this station is designed for optimal functionality.

Streamline your work process by having immediate access to essential information, power for your laptop, and a digital platform for viewing the latest plans and documents. The DataStation is a strategic asset for embracing Industry 4.0 principles, allowing for efficient and eco-friendly operations outside the traditional office setting. Its mobility is enhanced by sturdy castors, enabling you to relocate it effortlessly to wherever it's needed most.

The DS2 DataStation prioritizes security with robust, keyed-alike 5-lever deadlocks, ensuring your valuable office equipment and power tools are stored safely.
