

# Concrete Testing Hammer

**SKU:** 280300

## PRODUCT DESCRIPTION

The W-M-250 Manual Test Hammer is an essential solution for effortlessly conducting non-destructive testing of hardened concrete. It's a straightforward and reliable instrument for quickly gaining insights into concrete strength in various parts of a structure. With its capacity to verify strengths starting from 1400 PSI (10 MPa), it's particularly effective for quality control and ensuring uniformity across your construction projects. Its ease of use and immediate feedback make it an invaluable tool for professionals seeking to maintain high standards of concrete integrity and strength.
