

## Hardwood Formply - 18Mm - 2440 X 1220Mm

**SKU:** 6190-FP241218

### PRODUCT DESCRIPTION

**Hardwood Formply is manufactured from hardwood veneer in a multi laminate panel construction overlaid with a high density resin impregnated film.**

**Suitable for multiple re-uses but not requiring the highest quality concrete finish.**

The multi-ply construction provides increased strength and stability. Hardwood Formply is an economical non-structural formply ideal for many common concrete forming applications.

### Dimensions

- 2440 x 1220mm 18mm

## **Technical Specification**

- Finish – Dark brown phenol film 120g/m<sup>2</sup>
- Class – Hardwood
- Glue Bond – Exterior

## **Concrete Mix/Placement**

Certain concrete mixes additives and practices can adversely affect the performance of the panel and/or overlay. Slump and rate pour should always be consistent with the design of the form.

## **Cleaning and Treatment**

Soon after removal plywood should be inspected for wear cleaned repaired spot edge sealed and treated with a chemically reactive release agent before re-use. A hardwood wedge is preferred to hard wire brush when scraping panels.
