

Lvl Timber 95Mm X 47Mm X 5.8M

SKU: 6196-LVL954760

- Dimensions 95mm x 47mm
- Length 5.8m

PRODUCT DESCRIPTION

LVL Formwork Beams are a structural LVL timber manufactured in a controlled process to meet the requirements of AS/NZA3457. It is used in suspended applications for bearers, joists and walers in suspended or vertical formwork applications.

LVL timbers are dimensionally straighter and stronger than standard timber and are often lighter making them ideal for many formwork applications.
