

Orange Dpm Polythene - 4M X 25M 300 Mic

SKU: 6190-OP425

- 4m x 25m roll
- 100m²
- Heavy duty 300mu
- Damp proof membrane
- Folded roll for easy handling

PRODUCT DESCRIPTION

Powerpac's Heavy Duty Orange Polythene is a popular choice for construction projects, particularly as a damp proof membrane. Made from composite resins, it offers maximum resistance against water vapour flow, less than 90mns/g.

This robust material is not only easy to install but also provides a reliable and efficient barrier against dampness. Its superior performance makes it an ideal solution for preserving the durability and integrity of your building structures, especially when used with concrete slabs.
