

Precast Magnet - 280 X 60 X 40Mm (Formwork Clamp Not Included)

SKU: GME-900

- 280 x 60 x 40mm
- Does not include clamp - see GME-900C or 8mm Clamp code - see product GME-900C8MM

PRODUCT DESCRIPTION

Precast Concrete Magnets or shuttering magnets as they are also known as, are often used in civil engineering jobs for buildings. It contains a magnet surrounded by a steel casing with a handle to engage/disengage the magnet.

To apply to a ferrous surface simply place where you want the magnet to be and push down on the handle and the magnet will be attached to the ferrous surface. To remove just lift the handle by using a crowbar and the magnet will come off the ferrous surface.
