

Geotextile Cloth - Class B 1.9Mt X 50Mt

SKU: 6175-GTB1950

Details:

- 1.9m x 50m
- Class B

PRODUCT DESCRIPTION

Application:

- Separation/stabilisation
- Under driveways & pathing
- Behind retaining walls
- Sub soil drainage
- As a separation layer between two materials e.g clay base and GAP40. This will prevent the two materials mixing which wastes expensive aggregate.

- For reinforcing/strengthening the ground. This will ensure your surface is more stable for years to come. Particularly useful with peat/unstable clay ground conditions. For filtration as the Geotextile allows the displacement of water across the relevant area.
