

Economy Screw Bolt Hex M10 X 60Mm Galv - 25Pk

SKU: ESB10060G-25

- 25 per pack
- M10 x 60mm
- Galvanised

PRODUCT DESCRIPTION

This Economy Screw Bolt is designed to meet a lower price point. It is ideal for NON STRUCTURAL applications such as Bollard / Car stops / Temporary handrails etc. Limited load data is available for download below. The Economy Screw Bolt achieves a high load while generating Low Expansion forces which can make it a great alternative to sleeve or wedge anchors. The Economy Screw Bolt is also completely removable making it ideal for temporary applications. Unlike mechanical expansion anchors, the Economy Screw Bolt keys into the base material for the entire depth and diameter of the

hole, not just at the base of the hole. This reduces high energy forces within the concrete allowing close anchor spacing and near-to edge anchor locations. Sharp thread forming teeth ensure the most secure connection in hard base materials. The Economy Screw Bolt is a truly versatile anchor, as it can be installed in whole range of base materials such as concrete, block, brick, timber, marble, and stone, just to name a few.

The highly engineered design of this Economy Screw Bolt is the result of extensive testing and provides market leading load performance. Economy Screw Bolt is a one piece, fast, efficient and cost effective fixing solution for any job.
