

Apt Hydraulic Breaker 25Kg

SKU: 1940-1801354778

25 kg weight

1" x 4 1/4" Shank

20 lpm flow rate

High Impact for Kerb & Channel & foot path, slab breakout.

PRODUCT DESCRIPTION

APT hammers and breakers combine flexibility with hard-hitting power. The MH 11 pick hammer is designed for horizontal work in renovation, demolition, and structural alterations, while the MH 55 (medium-weight) and MH 70 (heavy-duty) multipurpose breakers are ideal for road building and maintenance on asphalt, brickwork, frozen soil, or concrete. Features • Slim design for excellent line of sight to the working tool • Quick-release couplings for fast connections • No external side bolts or protruding parts • High back pressure (HBP) models can be operated from the PTO outlet of most skid-steers • Vibration-reduced (A) models offer the same breaking performance with additional operator comfort.
