

Endo Air Hoist - At-125K - 125Kg/3M Lift, 2 Button Pendant Control, Top Hook Suspension

SKU: 400710

Endo Air Hoist - AT-125K offers a high-standard solution for your diverse lifting requirements. With its broad lifting capacity ranging from 60kg to 125kg, it caters to a variety of demanding tasks.

PRODUCT DESCRIPTION

User-friendly operations are central to the AT-125K. A control button on the pendant switch facilitates easy handling, and for the AT-60-K-5 and AT-125-K-5 models, an emergency stop button on the pendant switch is standard, ensuring quick response in precarious situations.

Notably, the AT-125K features an extendable surface-hardened load chain made from alloy steel, guaranteeing toughness and resistance against wear and tear. This feature not only improves the hoist's durability but also adds a layer of safety during lifting operations.

The Endo Air Hoist - AT-125K, with its combination of strength, safety, and straightforward operation, reflects Endo's unwavering commitment to top-tier performance in lifting operations. Choose the AT-125K for unmatched reliability, precision, and operational safety in your workspace.

Model	Rated load (kg)	Stroke (m)	Air pressure Mpa(kgf/cm ²)	Lifting speed (m/min)	Air consumption (m ³ /min)	Chain (size x fall)	Air inlet	Mass (kg)
