

Endo Air Hoist - Ehl-3Ts - 3000Kg/3M Lift, Pull Cord Control, Top Hook Suspension

SKU: 400180

- 3000kg/3m Lift
- Pull Cord Control
- Top Hook Suspension

Boasting a powerful capacity ranging from 250kg to 3000kg, the Endo Air Hoist - EHL-3TS takes performance and reliability to new heights. Designed with a surface-hardened load chain made from alloy steel, it offers unmatched toughness and wear resistance, ensuring smooth operations even in the most demanding environments.

PRODUCT DESCRIPTION

A unique feature of this model is its extendable load chain, offering adaptable functionality for various lifting needs. Standard on the EHL-3TS is a pull cord control for precise lift control, providing enhanced handling and ease of operation. For button-type control, the inclusion of a separately-purchased pendant switch elevates user interaction.

The Endo Air Hoist - EHL-3TS is committed to not only efficient performance but also safety. It's an essential addition to your lifting gear arsenal, combining exceptional durability, versatility, and control. Embrace the confidence and reliability that comes with the Endo Air Hoist - EHL-3TS, and take your lifting tasks to new levels of precision and efficiency.
