

Bitumen Board 12Mm 2200 X 1220Mm 35%

SKU: BB122012

Powerpac's Bitumen Board, is a semi-rigid, highly compressible joint filler designed specifically for movement joints. It's crafted with a dense fiber board saturated in bitumen to ensure a self-sealing property, which effectively blocks out debris like gravel and sand that could impair the joint's ability to expand and contract.

Size:

- 2200mm x 1220mm
- 12mm thick

Benefits

- Cost-effective solution
- User-friendly design
- Effectively seals joints against sand, debris, plant growth, and dirt
- Resilient under compression, preventing extrusion
- Durable, with no risk of rotting or deterioration over time

PRODUCT DESCRIPTION

Application Instructions:

The bitumen board is user-friendly and can be tailored to your needs using common tools such as utility knives or handsaws. For installation, align the board flush with the edge of the concrete structure and secure it using either concrete nails or a general-purpose construction adhesive.

Recommended Uses:

This product is ideal for a variety of movement joints, including:

- Concrete slabs
- Roadways, footpaths, ramps, and runways

- Structural concrete elements
- Retaining walls
