

SMARTRIB

CONCRETE STOP END

WHAT IS SMARTRIB

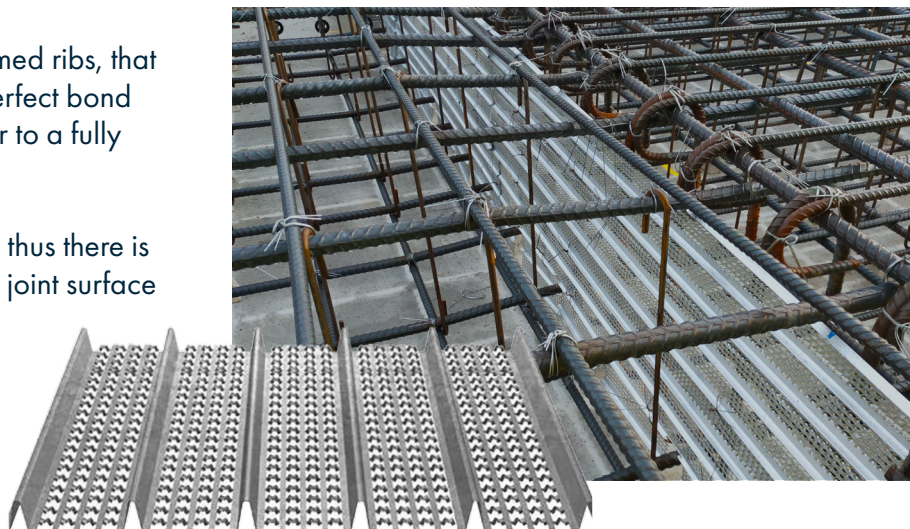

SKU: 6193-SRSE

SmartRib is a machine made unique mesh galvanised steel sheet stiffened by roll-formed ribs, that retains poured concrete and provides a perfect bond and shear key to the follow-on pour similar to a fully scabbled joint.

SmartRib becomes a permanent formwork thus there is no stripping required or preparation of the joint surface for the next pour.

Powerpac SmartRib Specifications:

- 455mm x 2250mm size sheet
- 0.4mm thickness

SMARTRIB BRACING REQUIREMENTS:

Concrete Depth	Distance Between Supports
250mm	800mm
500mm	700mm
1000mm	600mm
1500mm	500mm
2000mm	350mm
2500mm	270mm
3000mm	220mm

FEATURES & BENEFITS:

- Easy to cut and shape
- Reduced cost and labour
- Enables pour to be visually monitored
- Can be installed before reinforcement
- No cleaning, refacing, or oiling needed
- Lightweight and easy to handle
- No deformation - will hold its shape under extreme weather conditions

APPLICATIONS:

- Concrete slabs in buildings
- Bridge decks for safe driving surfaces
- Concrete columns and beams
- Roads and pavements, including sidewalks
- Retaining walls in landscaping
